

# PREVENTION SAVES LIVES

The Deterra® Drug Deactivation and Disposal System destroys the drugs that can destroy lives. It is a simple, cost-effective way to properly dispose of unused and expired prescriptions and over-the-counter medications. This sample pouch shows you just how simple and effective it is.

## SAFE

The Deterra System is the only solution for safe, permanent medication disposal. Made with non-toxic materials, Deterra Pouches are also safer for the environment. Plant-based, environmentally sound packaging prevents harmful medications from contaminating landfills and water systems.

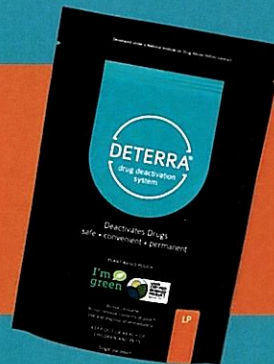

## CONVENIENT

The simple, three-step process permanently deactivates ingredients and renders medications inert so they can't be accidentally ingested, stolen, abused or leaked into our ecosystem. Deterra Pouches are non-toxic, and can be thrown away with normal household trash.

## PERMANENT

Deterra is the only independently tested and environmentally sound system to permanently destroy prescription and over-the-counter pills, patches, liquids, creams and films. Powered by proprietary activated carbon, Deterra doesn't just mask medications in a gel or liquid—it destroys them for good.

To see how Deterra deactivates pills, patches, liquids, creams and films, **scan the QR Code** and watch our how-to videos.
